November 2009
PSYCHIATRY GRAND ROUNDS

The University of Texas Health Science Center at San Antonio
7703 Floyd Curl Drive

1:15 - 2:30 pm
Room 409L
210-567-5492

Tuesday, November 3, 2009

“Additions and extensions to Jung’s Theory of Psychological Types”

Learning Objectives: Mental health professionals who attend this program will be better able to identify different styles of consciousness in their patients, using the categories of cognitive psychology first proposed by C. G. Jung. They will also learn to associate these different cognitive styles, in accord with more recent additions and extensions to Jung’s findings explored by the speaker, with areas of ego-strength and interpersonal reliability as well as areas of vulnerability and potentiality for the manifestation of psychopathology.

John Beebe, M.D., Private practice of Psychotherapy and Jungian Analyst in San Francisco, CA

Tuesday, November 10, 2009

“Neurobiology and pharmacotherapy of substance use disorders”

Learning Objectives: 1) To teach health care professionals about Pharmacogenetic selection of patients for treatment with naltrexone for alcohol and disulfiram for cocaine dependence. 2) To teach health care professionals about Vaccines for Cocaine and Nicotine dependence.

Thomas Kosten, MD, JH Waggoner Chair and Professor of Psychiatry and Neuroscience at Baylor College of Medicine, Acting Mental health Care Line Executive for the VA in Houston, TX
